

Bender Board in Synthetic Turf Installation

A Better Solution

Nailer / Bender boards for synthetic grass installation offer the perfect combination of strength, stability, durability, and sustainability.

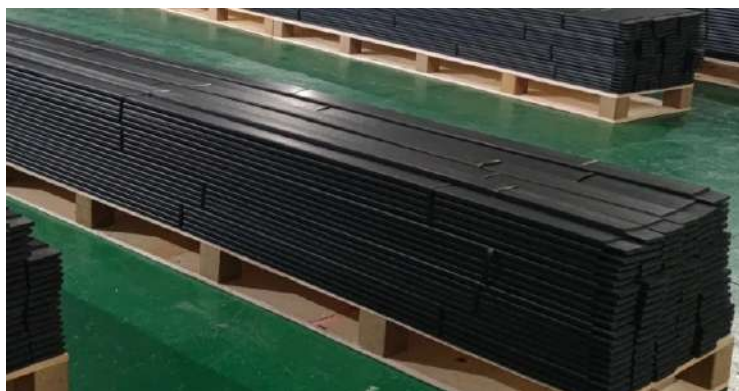

Why Nailer boards?

Unlike wood, our recycled plastic material system offers unmatched fastener retention and is resistant to moisture and chemicals.

With a similar expansion and contraction rate to nylon, our blend of HDPE plastic will reduce the long term stress on turf, extending the life for your product.

Product Profile

Nominal Size	Actual Size
1" x 4" x 20'	¾" x 3½" x 20'

*Available in many standard and custom lengths.
Standard color: Black. Other colors available on request.*

Features & Benefits

- Made in the USA with recycled HDPE plastic
- Sustainable & environmentally friendly
- Flexible material contours to unique designs
- Compatible with common woodworking tools
- High strength & durability
- Will not rot or decay
- Nonporous surface will not harbor bacteria from animal waste
- Waterproof
- Impervious to insects
- No splinters or cracking
- No sealants required
